

## DEKM Film Final EN

Commentator:

"A wonderful good morning and a warm welcome to the 5th and crucial round of the international German Kart Championship. We are guests in Genk, Belgium, and because of the changing weather there are difficult conditions for our drivers but nonetheless we wish you a lot of fun!"

Oliver Schielein (Promoter IKmedia GmbH):

"Yes, of course we also imagined the start into the DEKM 2018 to be somewhat different. We were surprised by the technical problems we had in Wackersdorf, but together with our partners, Rotax, Dekra and Porsche Motorsport, we did everything we could to solve the technical problems. We put a lot of effort into it and together with Dekra we have set ourselves high testing standards. Today we are happy to be here at the last run in Genk to successfully finish the DEKM season 2018. "

Anja Wassertheurer (Director Product and Technical Communications):

"Porsche Motorsport attaches great importance to promoting young talents. The importance is underlined by the large number of Porsche factory drivers active in worldwide motorsport which were selected by our scouts in young age. Also, electric mobility is an important future topic for us. We're entering Formula E, we've already gained experience in the LMP1. For us it was obvious to promote young talents from the base, which is in karting. Here we'll gather experience for the future and will definitely be there next year as well."
